

What are the design features of the SOS Dan Buoy MOB system?

Design Features

- Ready-to go, no assembling, “light and easy “ to use
- **Only Dan Buoy world-wide tested to elements of ISO 12402**
- Grab handles for security of person overboard
- High visibility marker allowing it to be seen 1700 metres (1 mile) has 2.5 metre (8.2ft) streaming ribbon
- SOLAS (automatic) light for night rescues
- Weights only 4 kilos (8 ½ lbs) can be used by everyone on board in an instant (similar size to ladies handbag)
- **Service Window** detecting at a glance set- to-go
- Reusable and can be repacked, requiring a 33 gram cylinder and UML cartridge
- Large drogue (120cm x 60 cm long) (3½ ft x 1½ ft) designed along life raft specifications
- The drogue can be removed and attach an anchor for temporary marker for wrecks, channels dive or crash sites.
- Compact, portable and smaller than a tackle box easily transported from boat to boat
- Can be used in fresh and salt water
- Rescue helicopter pilots find the SOS Dan Buoy an effective and accurate rescue system to indicate wind & current directions at water level.
- **In difficult and dangerous rescue operations deployment of several SOS Dan Buoys can be dropped from helicopter to assist in operational timeline.**
