

What spare parts are used in the SOS Dan Buoy 33?

- **33gram cylinder CO2 inflation system**

NOTE

UML Green Ready Indicators

Green

Both rectangular shapes are green=unit is ready to use;

Any **red shapes** += NOT ready to use (contract service agent)

- **UML Auto Inflator and automatic inflation cartridge**

Automatic-Latest Pro-Sensor Inflation technology. The Pro-Sensor is fitted with the latest all weather cartridge with the added benefit of inhibiting the accidental ingress of moisture and water spray during hot humid or heavy stormy weather should not activate the inflation system. The lightweight water-activated inflation system requiring a self-contained disposable **CO₂ inflation system** (the same mechanism as an inflatable lifejacket). The cartridge also has an **expiry date** and it has to be replaced prior to expiry. Please view <http://www.uml.co.uk/service.html>

Service Window provides at a glance that the SOS Dan Buoy 33 is set to go

- **Water activated SOLAS Flashing light**

It is activated automatically to output white flashing light when the water sensors contact with water. Under flashing working status, After activated, it is available with the operating sequence "FLASHING-STEADY-SOS-OFF" by the manual switch.

The light can be seen clearly from at least 1.5km in 360° directions so that it can increase the success chance of rescue. The exposed materials are anti-UV and corrosion resistant. The structure is so compact that the light is completely waterproof under 1m depth of water. The clip makes installation easily and firmly.
